

PSYM 1040: Platform Symphony 4.1 Administration Course

Duration: 3 Days

The Platform Symphony Administration course is designed to give IT system administration and application support teams the required knowledge to deploy, use, and maintain the Symphony clusters in their working environment. The attendees will gain a strong understanding of Platform Symphony architecture and resource & workload management concepts, and learn basic cluster configuration and administration skills.

Who Should Attend

This course is designed for system administration, grid and application support personnel who will be responsible for managing and utilizing Symphony grid. Application developers and end users can also benefit from this course.

Course Pre-requisites

Attendees should be familiar with UNIX/Linux and/or Windows operating systems and have basic system administration experience. Previous experience with Grid Computing technologies and solutions is beneficial but not required.

Course Materials

All participants will receive a copy of the training manual and workshops.

Course Content

- Symphony Overview
- Installation and Platform Management Console Orientation
- Resource Management
- SOA Workload Management
- Administration, Troubleshooting and Tuning
- Symphony Fault Tolerance
- Other Specific Topics (Such as Symphony Events, Reporting, ...)
